to the units under test.

Result:

The organic components of the **Ecomix Typ A** and **Ecomix Typ C** water softeners were tested according to the material-specific requirements of the German Food and Feed Act (LFGB). This was done based on the ResAP (2004) and the EU Guideline 2002/72/EG, in each case the currently valid version at the time of testing. In addition, a human toxicity assessment was performed on an ion exchanger-modifying ingredient that has not yet been evaluated at the German State and European level.

The results of our investigation in connection with the toxicology assessment raised no concerns regarding the use of the Ecomix Typ A and Ecomix Typ C products in question with respect to the filtration of water for food use.

The basis for this certification is our detailed test report ECOSOFT 01/11 dated 10 June 2011. The microbiological evaluation and the functional capabilities of the exchanger are excluded from the present assessment.

Munich, 10 June 2011
